

Badger — Term 2

English	In English, the children will write their own persuasive letter and end the term by learning and writing their own poetry.
Maths	During maths, the children will start our first multiplication and division unit, followed by our first fractions unit. They will revise foundational knowledge.
Science	Science lessons will centre around mixtures and reactions. We will investigate the different types of reactions that occur with some fun experiments.
Geography	In Geography, the children will answer the question “Where does our energy come from?” and explore non-renewable and renewable sources.
PSHE	Our PSHE topic is “Valuing Difference”, in which the children look at themselves, others and the importance of appreciating differences.
MFL	This term, we will start our first French lessons! We will learn the French words for everyday classroom objects and recap a few phrases.
RE	Our question for RE is “Why do some people believe God exists?” The children will use their critical thinking skills to consider religious beliefs.
PE	This term in PE, we will be playing basketball and practicing ball skills, as well as, playing tag rugby.
DT	Our focus for DT this term is food technology and nutrition. The children will get the chance to taste different breads and make their own rolls.
Computing	In computing, the children will practice their touch-typing skills in every lesson. We will look at how to stay safe online, online relationships and word processing.

Core Text

Macbeth is a brave and powerful Scottish soldier, who meets 3 mysterious witches. They prophesise that one day, he will be King! This classic, thrilling tale by William Shakespeare is full of spooky castles, secret prophecies, and tragedy.

During guided reading lessons, the children will explore the book and the characters. They will focus on vocabulary and dictionary skills, as well as, inference, prediction and summarising.
